## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12 and 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 12, line 6 there is no antecedent basis for "the outside". Also it was suggested that the fastener is attached to the outside of the bottom surface of the mat. Additionally, when the appropriate structure is added to the claim the functional recitation "for securing the closed end of the apparatus to an external surface" can remain. It is only when such recitations do not have a structural element claimed to perform the function that they are not given patentable weight. However, the recitation better explains the claimed structure in order to define the relationship between the parts and should be added back into the claim. The fastener on the protective mat should be claimed as a complementary component that complements and connects to the fastener on the tree stand base surface. Applicant must also add the tree stand structure to the body of the claim. Also the preamble needs to claim the tree stand in combination with the apparatus since the fastener on the stand is being claimed. This is needed to define the relationship between the component parts. Claim 20 also needs to provide the tree

stand and the step of standing in the tree stand. There is also no antecedent basis for "The outside in claim 20.

Claims 12 and 19-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

### ***Response to Arguments***

Applicant's arguments, , filed 12-12-07, with respect to the prior art rejection have been fully considered and are persuasive. The prior art rejection has been withdrawn.

### ***Conclusion***

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
